Advantage :

Solar component for solar mounting system

1. Material: Aluminum alloy Al6005-T5
2. Easy installation
3. Can work under typhoon, earthquake, salt-laden air etc. Locations.
4. Anticorrosive: Anodized aluminum

The customized rail and pipe length can eliminate the weld and cut onsite to keep the high anticorrosive performance, the structure strength and the appearance.

Our clamp kist and the various roof hooks can be high preassembly and make installations very easy and quick to save your labor cost and time

With all components comprised of high quality stainless steel and anodized aluminum alloy, we promise you 25years service life and 10 years warranty.
