

Lattice Wave Aluminium Core Composite Panel With Formability For Aerospace

Our Product Introduction

for more products please visit us on aluminumextrusion-profiles.com

Basic Information

- Place of Origin: China
- Brand Name: MetalPlus
- Certification: CA ,CE
- Minimum Order Quantity: 1 ton
- Packaging Details: Ep paper ,kraft ,pallet
- Delivery Time: 20days
- Payment Terms: T/T ,L/C
- Supply Ability: 100 000ton each month

Product Specification

- Product Name: Aluminium Core Composite Panel
- Application: Construction
- Material: Aluminum
- Surface Treatment: PVDF Paint
- Size: 1.2*2.5m Or Customized
- Logo: Customized
- Highlight: **Aluminum Lattice Wave Core Composite Panel,
Aluminum Core Composite Panel With
Formability
,
Aluminum Core Composite Panel For
Aerospace**

Product Description

New Product Aluminium Core Composite Panel ,Aluminum Lattice Wave Core Composite Panel

Features

Light weight:

With the innovation of core technology, Aluminium Core Composite Panel has only 4.3kg/m² weight which is lighter than other materials with the same rigidity. It saves cost in transportation and labor.

Fireproof performance:

This structure assures the panel of non-combustibility and makes it more reliable and popular in all façade applications, especially in USA (NFPA285), UK (BS 476-4 standard) and Australia (AS1530.1 standard) where there is a higher requirement and demand on fire retardancy.

Formability:

Aluminium Core Composite Panel is convenient to be cut and grooved and less wearing on routers. Therefore, it saves your budget and time. It takes on many different shapes and its perfect formability does not affect its stability or flatness.

Environment friendly:

Being a member of our earth, we have the responsibility to protect our homeland. Our corrugated aluminium core of Composite panel is 100% recyclable. Also there is no pollution during the production and application.

As a creative facade material, ACCP has a totally different from traditional composite panels:

Aluminium Core Composite Panel
ACCP

Advantage

Lighter than aluminum solid panel
Much cheaper than aluminum honeycomb panel
More durable than aluminum corrugated panels

Strength

ACCP

Box made of 1300 x 2700mm

No deformation with 62KG

No deformation with 140KG

No deformation with 210KG

No deformation with 300KG

Application

Architectural wall Cladding and decoration
 Architectural Rainscreen Facades and canopies envelope.
 Lightweight interior and exterior architectural panels.
 Aerospace, Marine & Transport Flooring, ceilings, Walls & Partitions
 Silk Screen Printing Tables, doors and cabinets
 CNC Vacuum Bases
 Lightweight Floors, Walls, partitions, canopies, Ceilings, roofs etc.
 Special Purpose Panel Design

Continuous Production

HENTEC Hentec Industry Co.,Ltd
